How to install the Shopa Marketing Assistant

Takes about 3 minutes. You only need to do this once on your computer.

You need: Google Chrome on your computer, and the `dist.zip` file sent to you by the team.

INSTALL IN 6 STEPS

1. **Unzip the file**
   Right-click `dist.zip` → Extract All... → choose a place you will keep, e.g. **Documents\Shopa Assistant** → Extract.
   ⚠ Don't delete or move this folder later — Chrome runs the extension from it.

2. **Open Chrome's extensions page**
   In Chrome, type `chrome://extensions` into the address bar and press **Enter**.

3. **Turn on Developer mode**
   Click the Developer mode switch in the **top-right corner** of the page so it turns blue.

4. **Load the extension**
   Click Load unpacked (top-left). Open the folder you extracted and select the **dist** folder.

5. **Check it worked**
   A card called **Shopa Marketing Assistant — 1.2.0** appears on the page.

6. **Pin it to your toolbar**
   Click the **puzzle-piece icon** 🧩 at the top-right of Chrome, then click the **pin** 📌 next to Shopa Marketing Assistant. The Shopa icon now stays visible.

HOW TO USE IT

1. **Open the business website**
   In Chrome, go to the website you want to check, e.g. a prospect's homepage.

2. **Click the Shopa icon**
   Click the Shopa icon in the top-right of Chrome (the one you pinned in step 6).

3. **Click Generate Report**
   Click Generate Report. In a few seconds the client report opens in a new tab, with talking points ready for your meeting.

GOOD TO KNOW

- **Check any website without opening it:** click Dashboard, type the web address (e.g. *example.com.au*) and click Analyse. Click **Allow** when Chrome asks.
- **One-time setup:** open **Settings** ⚙ in the dashboard and fill in your name and contact details — they print on every client report.
